

Please, the Wisconsin No Call List is the greatest thing. There is nothing better than a peaceful evening at home interrupted only the phone ringing for the kids, NOT telemarketers. It has made a big difference in the quality of life we enjoy as a family. I have been on the no call list long enough to almost forget how upsetting it can be to stumble over a chair getting to the phone only to realize it is a telemarketer. I do not think a business that has a desirable product or service should have to resort to such invasive practices to elicit business. Do not encourage the passing of legislation that would weaken in anyway the Wisconsin No Call laws.
